Project is in compliance with Wetland Conservation Act.

_____

SWCD Technician Signature

Project is in compliance with HLWD Rules and Regulations.

_____

HLWD Technician Signature

An application fee of $10 and a field inspection fee of $40 have been paid for each storm water permit. SWPPP and/or design information must be submitted with this application. After-the-fact permits will be subject to the application fee and all other costs incurred by the Heron Lake Watershed District. If, in the opinion of the Board of Managers, it is necessary for a consultant to review the application and all exhibits, view the site, and make a report to the watershed district as to the technical implications of the work, costs incurred by the watershed district during this review shall be borne by the applicant. Unless otherwise specified in the permit, works for which the permit are issued shall be completed within two years or an extension must be requested.

Both contractor(s) and landowner(s) are responsible for installing and maintaining erosion control practices, during all phases of construction, until the final stabilization of the site occurs.
